Attention: Broadband Division, Wireless Telecommunications Bureau

Re: WT Docket No. 06-136

Dear Ms. Dortch:

Oklahoma Western Telephone Company submits this notification to transition operations from the "old" to the "new" Broadband Radio Service ("BRS") centered near Clayton OK. Video operations that used the old channels under the terms of an "opt-out waiver" will be discontinued.

As holders of licenses covered by an "opt-out waiver" granted by the Wireless Telecommunications Bureau in a MEMORANDUM OPINION AND ORDER, DA 10-1000 (2010) ("MO&O"), we hereby notify the Commission, in accordance with directives in paragraph 22 of the MO&O, of a plan to transition operations to the new band plan for the BRS.

This notice pertains to the following licenses:

WLK382	Channels E1-E4	Clayton, OK	OWTC
WNTC664	Channel H1	Clayton, OK	OWTC
WNTC500	Channel H2	Clayton, OK	OWTC
WNTD797	Channel H3	Clayton, OK	OWTC

All video service provided by the company on the "old" BRS channels will be discontinued to allow for transition to the new band plan for BRS operations. Transition to the new band plan will allow for deployment of innovative and efficient communications technologies and services in the 2.5 GHz band. It is expected that the transition will be completed by December 31, 2019.

The video system is being phased out and being replaced by the development of a new wide area internet system. LTE systems will use the bandwidth as part of a newly constructed 4th generation system. All spectrum will be reutilized in the new deployment.

This notification is being served on all licensees that are part of the waiver, all other licensees whose reference points are located within the same Basic Trading Area, and any other licensees whose geographic service areas ("GSAs") overlap with the GSAs included in the opt-out waiver. We note that any objections to or comments on the proposed plan shall be filed within 30 days after this notification is filed with the Commission.

Very truly yours,

Dustin Hilliary  
President
